

ROBONILE INDUSTRIES

From The Main idea to The Final Product

WHO WE ARE ?

About Us

Robonile is one of the leading companies in Egypt, specializing in supplying, installing, training, and providing after-sales support in the localization of various industries. These include research laboratories' equipment and instruments, electronic devices, steel structures, and computerized machines for a wide range of customers.

Our vision

Usage of science and technology to reveal a smarter world

Our Mission

We are keen and committed to providing distinguished products, high level education and optimum research and development to match the current market needs and manufacturing standards.

WHY CHOOSE US ?

Customized

Solutions designed for customers' unique needs

Expert Team

Support local manufacturing initiatives with our experts

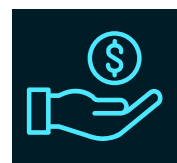

Quality

Delivering high quality products you can trust

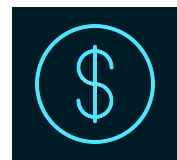

Maintenance

Reliable support to keep your products running efficiently

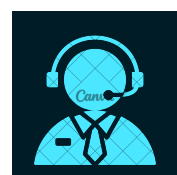

Low Cost

We provide smart solutions that fit your budget

Dollar Saving

Minimize your reliance on imported products

After-sales Support

Expert services and consultations that boost client productivity.

We design exclusively for you

our company customizes products to match the exact dimensions and requirements specified by each client

Solar light posts for lighting and decoration

We design and manufacture the stunning illuminated posts. Powered by solar energy, these posts add beauty and charm. you can use them for home gardens, tourist resorts, sports and social clubs, as well as public areas, commercial and educational institutions. we can also control the illuminated color by infra red remote control with more than ten different color.

Solar umbrellas and pergolas with LED lights and phone charging.

We offer unique designs made of wood or weather-resistant iron, equipped with solar panels and a lithium battery for energy storage. These can be used for lighting or charging phones and are suitable for home gardens, tourist resorts, sports and social clubs, and public parks.

Robonile Solar-powered tables

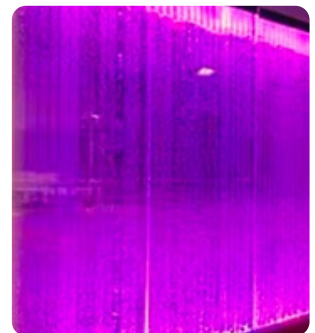

We design, multi-colored illuminated tables with remote control, adding elegance to reception areas in homes, resorts, clubs as well as the commercial and educational institutions. Our tables enhance the beauty of any space and create a unique welcoming atmosphere.

Also, due to the low power consumption, solar cells and lithium battery can be added to these tables

LED-Illuminated walls and related decorative designs

Robonile has charming decorative solutions with stunning multi-colored illuminated products for homes, gardens, tourist resorts, social clubs and public areas.

ROBONILE INDUSTRIES (RI)

Products'chain

Electric furnaces for laboratories

Robonile provide electrical furnaces for research laboratories in universities, institutes and companies. this product is designed and manufactured by Robonile for heating samples up to 900 degree Celsius with specially designed accurate control system.

Thermoelectric and DC electrical measurement unit

We designed and manufactured thermoelectric instruments for measuring thermoelectric properties of research samples. the instrument is operated automatically using a specially-designed software program.

Incubators

Our incubator devices are designed and manufactured according to desired specifications of our clients with accurate control of temperature and other needed parameters.

Samples' die for pressing pellets

This samples' die used for preparing pellets for research laboratories, it made from stainless steel 316 with inner diameter 10 mm.

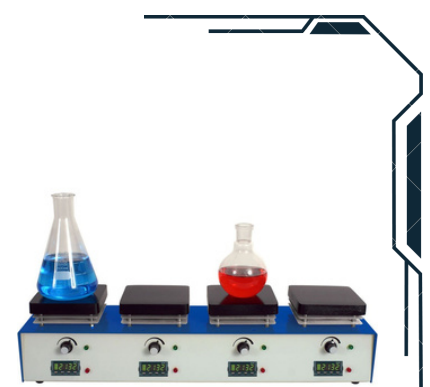

Samples' shakers

We offer a samples' shaker for research laboratories, it is provided by automatic control and digital display. also, it has sliding holders for the used beakers or conicals.

Multi system of magnetic stirrer with hot-plate

We design and manufacture multi system of magnetic stirrers with heating plates, each unit is provided by accurate control with digital display for temperature, rpm and timer to automatically switch off the unit.

ROBONILE
INDUSTRIES

The future of technology in Egypt

We are a pioneering company in the field of localizing industry and technology, and we cooperate with government institutions and the private sector to achieve industrial development and increase the gross domestic product.

Our sponsors will enjoy unique benefits through various channels. Your brand will be prominently featured in our training courses, workshops and our international conferences strengthening your presence in the industry's localization efforts.

We believe in collaboration and are actively seeking to establish partnerships with educational institutions and research institutes to bridge the gap between scientific research and local industry. By collaborating with us we will play a vital role in promoting and localizing the industry.

We invite you to support our goal and help us achieve our plan faster, in line with our nation's ambitions. Together, we can create a brighter future.

Categories of sponsorship and the corresponding annual benefits are outlined in the following table:
